

Layer7Risk Cyber Board Brief™

EXECUTIVE CONFIDENCE IN CYBER CONVERSATIONS

WHAT IT IS

The Cyber Board Brief™ is a focused 60-minute advisory session designed to help business leaders translate cyber risk into strategic, executive-level priorities.

We examine cyber risk through the lens of business impact, leadership accountability, operational resilience, third-party exposure, and insurance, giving leadership a clearer view of what deserves attention.

WHO IT'S FOR

CEOs, CFOs, COOs, managing partners, board members, and other senior leaders who need to understand and discuss cyber risk without getting buried in technical detail.

WHY IT MATTERS

Cyber risk is a leadership issue.

Yet critical decisions are often fragmented across IT, security providers, operations, insurance, and outside vendors.

Leadership may lack visibility into actual cyber exposure.

Ownership and accountability may be unclear.

Critical third-party dependencies can go overlooked.

Boards are asking questions leadership cannot always answer.

The Cyber Board Brief brings those issues into one business-level conversation.

WHAT WE EXAMINE

Leadership & Accountability

Business & Operational Impact

Third-Party & Vendor Exposure

Incident & Response Readiness

Insurance & Risk Transfer

Governance & Executive Visibility

WHAT YOU GET

A concise, plain-English executive brief including:

- > Key cyber risk observations
- > Leadership and operational gaps
- > Business impact considerations
- > Prioritized recommendations
- > Questions leadership should be asking next

Not more technical information. Better executive conversations and better-informed decisions.

WHAT IT'S NOT

- > Not a penetration test or security audit
- > Not a compliance certification
- > Not a replacement for your MSP or security provider
- > Not an insurance sales meeting

It's strategic cyber risk advisory built for leadership.

HOW IT WORKS

THE LAYER7 DIFFERENCE

- Cybersecurity may be technical. Cyber risk is business risk.
- Layer7Risk helps leadership connect technology, operations, third-party dependencies, governance, and insurance into a clearer picture of organizational risk.
- We help leaders ask better questions and know which answers matter.

LEAD THE CYBER CONVERSATION WITH CONFIDENCE.
